

## Project Engineer – Transportation

McClelland Consulting Engineers, Inc. (MCE) is seeking a Project Engineer to join our Transportation Department in our Fayetteville office. This position will assist in the design of construction projects dealing with projects such as roadways, traffic management, signalization, multi-use trails, stormwater drainage, etc. A Project Designer must also have knowledge of commonly-used concepts, practices, and procedures within the fields of civil engineering.

### RESPONSIBILITIES AND FUNCTIONS

- Take on and/or supervise the design of transportation, multi-use trail and stormwater drainage projects.
- Be actively involved with aspects of project management during the construction phase of projects, notably construction administration and site visits as needed.
- Estimating costs, personnel and materials, preparing written communications and reports, design research and calculations, technical specifications, establishing and meeting completion dates.
- Exercising independent judgment, intuition, creativity, problem solving, planning, communicating and use of technical and analytical skills.
- The Project Engineer will have the ability to advance his/her career based on service, capabilities and productivity. He/she will be expected to assist in leading and directing the work of other members of the project team.

### QUALIFICATIONS AND SKILLS

- Bachelor's Degree in Civil Engineering (Required).
- Professional Engineer license in the State of Arkansas, or ability to obtain an Arkansas license within the next 12-18 months.
- Strong oral and written communication skills.
- Ability to Operate AutoCAD Civil 3D or MicroStation.
- Experience with signalization design, use of Synchro, SIDRA and Rodrel software desirable.
- Shall have knowledge of commonly-used concepts, practices, and procedures within the field of engineering.
